Sustainability

No boundaries for all kinds of flexible working styles.

The imageRUNNER ADVANCE portfolio is an intelligent business platform built to complement every stage of the document life cycle. From creation to sharing, output to archival, it is designed to help you increase productivity and efficiency, meet security and environmental needs, control costs, and optimise your return on investment.

From small workgroups and offices to large departments and print rooms, this platform offers a wide range of models and integrated solutions with the proven technology to help address the document workflow challenges of evolving work environments.

The imageRUNNER ADVANCE platform can be customised to help meet the specific requirements of your business. It can integrate seamlessly with Canon solutions and third-party software to provide powerful output management, document capture, information management, and automated workflow solutions that help streamline daily business processes.

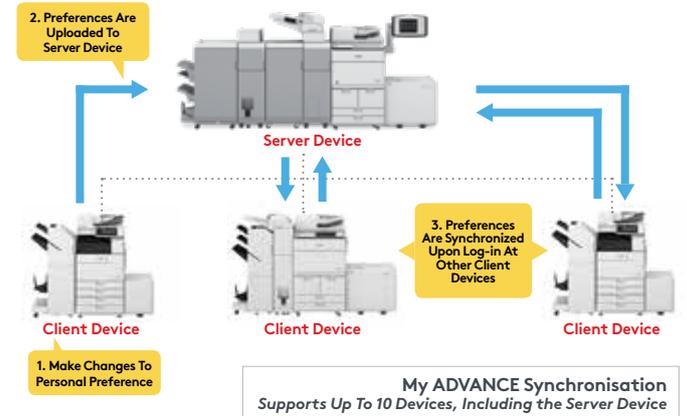

EXCEPTIONAL EASE OF USE

Designed for easy operations, imageRUNNER ADVANCE devices feature a large and intuitive touch-screen interface that provides seamless and effortless navigation. Built-in tutorial and support videos assist with basic maintenance to help maximise uptime. With a common platform and operating principle across the portfolio, users will be comfortable with any device.

PERSONALISED EXPERIENCE

Users can customise their own unique, personal workspace with My ADVANCE by selecting their default login screen, preferred languages and even customise workflows. My ADVANCE user preferences can be synchronised across up to 10 devices without a server, so that preferences follow the user throughout the office.

WORKFLOW EFFICIENCY

To address time and resource concerns, the imageRUNNER ADVANCE platform has been designed to help increase productivity and grow your business with efficient, streamlined workflows.

SUPPORT FOR MOBILE WORKFLOWS

Scalable support for flexible working practices can help increase efficiency by allowing workers to capture or print documents on the move and quickly link their compatible mobile devices into business workflows. With ways such as Wireless LAN, Direct Connection as well as QR code Pairing, connection between smartphone or tablet and the imageRUNNER ADVANCE system has never been easier.

BUILT-IN INTELLIGENCE

A range of intelligent features helps to streamline document workflows and maximise productivity. Motion sensor technology intelligently wakes the device from Sleep mode to reduce waiting time, while smart media handling capabilities—such as skip blank pages* and multisheet feed detection*—help facilitate efficient scanning.

STREAMLINED DOCUMENT CAPTURE

Powerful scanning capabilities enable streamlined document capture and digitisation. Simultaneous, two-sided scanning* helps deliver fast results, allowing you to easily send documents to a multitude of destinations. Support for scanning and converting documents to Searchable PDF, Microsoft® Word, and Microsoft® PowerPoint formats is available as an option. For process and workflow optimisation, imageRUNNER ADVANCE systems integrate seamlessly with a range of powerful Canon and third-party software, thanks to the embedded MEAP and MEAP Web application platforms.

* Available on selected imageRUNNER ADVANCE models.

Complete Document Life Cycle with Therefore

INFORMATION MANAGEMENT

Organisations can incur significant costs related to everyday document handling—inefficiencies in searching for and sharing information can waste both time and money. The imageRUNNER ADVANCE portfolio can help reduce hidden costs by utilising business process optimisation with fully integrated end-to-end document workflows. This enables quick and effective capture, archiving, and sharing of information, thereby facilitating efficient collaboration to reduce your reliance on paper-based manual processes and operational bottlenecks.

COST MANAGEMENT

Today's businesses are looking for operational efficiencies and a clear return on their investments. But many are unaware of the true cost of print and information management in their organisation, which can be significant if not managed properly. The Canon imageRUNNER ADVANCE platform is designed to deliver cost savings to help maximise return on investment.

uniFLOW

Control Device Access

Monitor and Track Usage

IT SUPPORT AND INFRASTRUCTURE

The IT department is often the first resource for print-related issues, which can be a burden. The imageRUNNER ADVANCE systems and integrated solutions are designed to help reduce these costs. Consistent, intuitive user operation across all devices as well as common driver and video assistance simplify user education and can help reduce escalations.

Support for industry standards, such as PCL® and PostScript®, enables direct integration with many IT systems. Powerful fleet management tools are available to provide remote, centralised control and updating of devices and fleets, including the ability to distribute settings, print policies, and restrictions efficiently.

OPTIMISED OUTPUT MANAGEMENT

The imageRUNNER ADVANCE systems with integrated solutions give you the ability to control device access, apply print policies, monitor output, and restrict usage by user. This helps to reduce unnecessary printing, encourage cost recovery, save on paper and toner, and optimise printing and scanning efficiency in your fleet.

ADMINISTRATION AND PURCHASING

The imageRUNNER ADVANCE platform can help address your hidden administrative and management costs by enabling services such as automatic meter collection and remote consumables management. The renowned quality and reliability of Canon's models, combined with remote diagnostics and assistance, can help reduce costs by minimising downtime as well as administrative interventions.

SECURITY

With confidential data regularly moving between a user's desktop, mobile device, and MFP, it's important to take measures to help protect your print environment. The imageRUNNER ADVANCE platform offers a range of security capabilities to help facilitate the confidentiality, accessibility, and availability of your information.

PREVENTIVE SECURITY

Ensure your device security during initialisation with system verification at startup, which provides protection against unknown firmware from being installed. With syslog protocol, real time security information can also be fed to a third party solution for a complete monitoring protection.

DEVICE SECURITY

Canon is serious about protecting your organisation's confidential information, your ability to control access, and the availability of your company data. With user authentication, you can control and limit users access to your devices, preventing unauthorised distribution of sensitive information. Visual and audible original reminder notifications can alert you to sensitive documents that are left at the device. ensuring confidentiality.

DATA AND NETWORK SECURITY

Canon's multilayered security solutions help safeguard sensitive data stored on the device and during transmission:

- HDD Erase removes latent images after each task.
- HDD Format removes and overwrites all data on the hard drive at the end of life.
- HDD Data Encryption helps protect information even after hard drive removal and it's now FIPS 140-2 validated on select models.
- A security chip with tamper-resistant hardware can help protect passwords and encryption keys.
- IPsec helps provide security for data as it traverses the network.
- SMB3.0 provides communication route encryption, which enables files to be transmitted to SMB3.0 servers more securely.

RELIABILITY & QUALITY

The imageRUNNER ADVANCE platform has been designed with the needs of your business as the primary focus. Quality and reliability are at the forefront of the research and development process and the entire user experience has been taken into account to bring to market a solution that not only supports busy working environments, but also lets them thrive.

V² COLOUR

OUTSTANDING QUALITY

The V² Colour technology maximises the capability of the device and toner to deliver impressive results with a vivid and vibrant appearance. Advanced greyscale capabilities also ensure superb monochrome prints. With the imageRUNNER ADVANCE systems, you can expect consistently high quality results across a wide range of media sizes and weights.

ADVANCED ADMINISTRATION AND MANAGEMENT TOOLS

By using iW Management Console, you can enjoy a centralised point of control across your entire fleet. You can check device status and consumables, turn off devices remotely and capture meter readings, as well as manage address books and print drivers. Firmware, device configurations, applications and settings can be easily updated for the whole or part of the fleet and security policies can be efficiently implemented.

AWARD WINNING TECHNOLOGY

Canon technology and expertise can help businesses achieve their objectives by delivering operational efficiencies - improving the way they manage information and simplifying their document processes. The imageRUNNER ADVANCE platform has earned numerous awards and recognition from leading industry analysts for its innovation, design and environmental features.

EFFICIENT MONITORING AND DIAGNOSTICS

Remote consumables management and device monitoring capabilities allow for seamless replenishment of your toner stocks and automated collection of meter readings. Remote diagnostics, event handling and parts lifetime management also enable preventive maintenance and rapid fixes for maximum uptime.

ENERGY EFFICIENCY

From the inside out, the imageRUNNER ADVANCE systems are designed for high energy efficiency and stellar performance. The combination of fusing technologies and low-melting-point toner helps lower overall energy consumption by minimising power requirements and reducing energy use during warm-up and while in stand-by mode. The imageRUNNER ADVANCE systems offer low Typical Electricity Consumption (TEC) ratings.

RESPONSIBLE WAY TO WORK

You can distribute digital documents and preview files to make changes prior to printing to help reduce the use of paper and consumables. Print drivers are defaulted to two-sided printing to help reduce waste. With Force Hold Printing, administrators can set the device to hold print jobs at the device until released, contributing to the reduction of paper wastage.

ECO-CONSCIOUS DESIGN

The imageRUNNER ADVANCE platform is designed with strong consideration for sustainability. Each device incorporates recycled materials and bioplastics made from plant-derived resources. Through its Life Cycle Assessment (LCA) System, Canon has also lowered carbon dioxide emissions by focusing on each stage of the product life cycle, including manufacturing, energy use, and logistics.

SUSTAINABILITY

Canon's commitment to the environment is an integral part of our product design, manufacturing, and corporate culture. The progressive thinking behind the imageRUNNER ADVANCE platform incorporates innovative, sustainable solutions that help keep your business operating efficiently while also helping to reduce your environmental footprint.
