FOCUS ON WHAT MATTERS

Dual Pixel CMOS AF

Capture precious fleeting moments with ease using the EOS 200D II's various autofocus features. For perfect portraits, just enable Eye Detection AF from the AF menu on your screen. This feature intuitively detects the eye of the subject closest to the camera lens. Even when shooting moving subjects, this feature follows the eyes with high precision to snap lively expressions on the go.

The Spot AF feature lets you shoot specific points of focus – smaller than 1-point AF. Perfect for perfectionists, this feature lets you take clear shots with even greater precision, especially in close-up and long-range photography.

REAL-TIME ACTION

Enjoy the flexibility of Live View shooting through the LCD screen, or switch to the optical viewfinder for greater stability and accuracy in snapping fast-moving subjects. There is no time lag between actual subject movement and your viewfinder display, so you can focus in real-time, all the time.

SHOOT IN TIME-LAPSE

With a tripod or simply a steady surface, you can take time-lapse videos with ease in 4K quality just by selecting a few simple settings. Document a glorious sunset, or an incoming storm. For a more expansive project, try capturing a flower bud blooming.

POWERFUL IMAGE PROCESSING

Powered by an approximately 24.1-megapixel APS-C CMOS sensor and the latest DIGIC 8 image processor, expect vibrant and sharp images with every snap.

MORE ANGLES TO SHOOT FROM

Designed for easy shooting at extraordinarily low or high angles, you can tilt, flip and swivel the display monitor to get the full view even in challenging angles.

EFFORTLESS CONNECTIVITY

With the Canon Camera Connect app installed on your smart device, you can easily transfer images from your camera to your smart device via Wi-Fi. What's more, with built-in Bluetooth low energy technology on your EOS 200D II, you can now check out your shots on smart devices even when your camera is turned off. Browse and select your favourites, then upload them on social media for friends and family to see.

SMOOTHER AND MORE BEAUTIFUL

Enhance every shot and selfie. The special Smooth Skin scene mode on your EOS 200D II takes you through five stages, where you can smoothen your complexion on photos in real time. Simply shoot and preview on Live View mode, and explore the enhancing effects on your display panel.

Smooth Skin Effect

STABLE EVEN ON THE MOVE

The Movie Digital IS² (Image Stabilization) feature on the Canon EOS 200D II effectively reduces the effects of shaky hands, and stabilises footages captured when you are on the go. All to deliver stable and quality video filming experience.

² Angle of view may be narrower in the Movie Digital IS mode. Compatible with selected lenses only. Not compatible with Movie Digital Zoom, time-lapses, HDR and Creative Filters.
